

# Langhammer Robot Palletizer AR

**A variety of infeeds and gripper systems make it possible to palletize almost any product. Due to their quick changeover times for different formats our palletizers are especially suited for handling high volumes and diverse packaging formats.**

**Be it the stand-alone version or integrated in a palletizing center – high availability and a strong reliability in performance are the core characteristics of Körber machines.**

Articulated Arm Robots offer highly flexible palletizing possibilities and are thus a real economical alternative. They are characterized by excellent accuracy and high-quality palletizing, also for sensitive products.

Körber Palletizers in combination with either Siemens or Rockwell controls guarantee the easiest programming and maintenance.

The Langhammer Robot Palletizer AR 500 is combinable with a variety of different infeed stations and grippers, especially the Langhammer Layer Wave.

## Features and benefits

- **Gentle product handling of complete layers with the Langhammer Layer Wave**
- **Consistent and proven operating concept allows easy configuration of layer patterns**
- **Color touch panel for easy operation**

---

### Load capacity

Single heavy layer weight up to 200 kg

---

### Optimized footprint

Optimal utilization of space

---

### High flexible layer formation

Allowing any number of layer patterns

---

### Open control system

For either Siemens or Rockwell
