

Langhammer Layer Palletizer PA 08

Our high performance palletizers are especially suited for handling high volumes and diverse packaging formats.

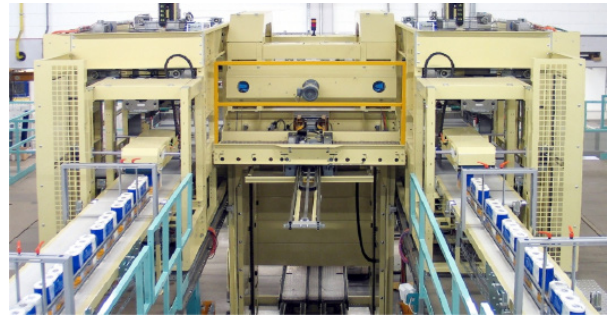

Be it the stand-alone version or integrated in a palletizing center – high availability and a strong reliability in performance are the core characteristics of Körber machines.

The Langhammer Layer Palletizer PA 08 can handle a variety of different products, such as cartons, cases, trays, crates but also bundles. Due to the modular building block design, our Layer Palletizer can be adapted to a large number of palletizing solutions. Because the format change is done automatically, no additional outside support for new layer configuration is necessary.

The Layer Palletizer PA 08 can be easily combined, either as a single-line or multi-line palletizer, with other palletizers to form a palletizing center.

Features and benefits

- **Placement of interleaves from dispenser or roll**
- **Handling of a wide product range**
- **Wide product range**
- **Toolless format changes**
- **Modular palletizer design adapts easily to any given layout**

Load capacity

Layer weight up to 250 kg

Cycle capacity

Up to 8 layers / minute

Pallet height

1900 mm / 2300 mm / 2700 mm

Open control system

For either Siemens or Rockwell

Optimized footprint

Very little space required on floor
